KFS Library

This library is deprecated and has been split up into its individual modules for better dependency management. Please use the new libraries.

1. General

This library is a collection of miscellaneous functions that turned out to be quite useful to have while creating my other projects. They are more or less grouped by common topic in a module.
For further documentation, read the provided docstrings or feel free to send me a message. I'm also always happy about suggestions and tips.

2. Installation

You can install this library from PyPi with `pip install KFS`.
